Agriculture Exposure Value

Agriculture exposure value refers to the estimated dollar value of crops and livestock determined to be exposed to a hazard according to a hazard-specific methodology.

Related Terms

[Expected Annual Loss](#), [Exposure](#), [Historic Loss Ratio](#), [Natural Hazard Risk](#)

Annualized Frequency

Annualized frequency is a natural hazard incidence factor for Expected Annual Loss, a risk component of the National Risk Index. It is the expected frequency or probability of a hazard occurrence per year.

[Learn more about Annualized Frequency \(/nri/annualized-frequency\)](#)

Related Terms

[Avalanche](#), [Coastal Flooding](#), [Cold Wave](#), [Drought](#), [Earthquake](#), [Expected Annual Loss](#), [Exposure](#), [Hail](#), [Heat Wave](#), [Historic Loss Ratio](#), [Hurricane](#), [Ice Storm](#), [Landslide](#), [Lightning](#), [Natural Hazard Risk](#), [Natural Hazards](#), [Riverine Flooding](#), [Strong Wind](#), [Tornado](#), [Tsunami](#), [Volcanic Activity](#), [Wildfire](#), [Winter Weather](#)

Avalanche

An Avalanche is a mass of snow in swift motion traveling down a mountainside.

[Learn more about Avalanche \(/nri/avalanche\)](#)

Related Terms

[Earthquake](#), [Natural Hazards](#), [Strong Wind](#), [Winter Weather](#)

Building Exposure Value

Building exposure value refers to the dollar value of the buildings determined to be exposed to a hazard according to a hazard-specific methodology.

Related Terms

[Expected Annual Loss](#), [Exposure](#), [Historic Loss Ratio](#), [Natural Hazard Risk](#)

Census Blocks

Census blocks are statistical areas bounded by visible features—such as streets, roads, streams, and railroad tracks—and nonvisible boundaries—such as selected property lines and city, township, school district, and county boundaries. Census blocks are the smallest geographic area for which the U.S. Census Bureau collects and tabulates decennial Census data.

Related Terms

Census Tracts, Geographic Information Systems (GIS)

Census Tracts

Census tracts are small, relatively permanent statistical subdivisions of a county or equivalent entity that is updated by local participants prior to each decennial Census as part of the U.S. Census Bureau's Participant Statistical Areas Program. The primary purpose of Census tracts is to provide a stable set of geographic units for the presentation of statistical data.

Related Terms

Census Blocks, Geographic Information Systems (GIS)

Coastal Flooding

Coastal Flooding is when water inundates or covers normally dry coastal land as a result of high or rising tides or storm surges.

Learn more about Coastal Flooding (/nri/coastal-flooding)

Related Terms

Hurricane, Landslide, Natural Hazards, Strong Wind, Tsunami, Winter Weather

Cold Wave

A Cold Wave is a rapid fall in temperature within 24 hours and extreme low temperatures for an extended period.

[Learn more about Cold Wave \(/nri/cold-wave\)](/nri/cold-wave)

Related Terms

[Ice Storm](#), [Natural Hazards](#), [Strong Wind](#), [Winter Weather](#)

Community Resilience

Community Resilience is a consequence reduction risk component and community risk factor that represents the ability of a community to prepare for anticipated natural hazards, adapt to changing conditions, and withstand and recover rapidly from disruptions.

[Learn more about Community Resilience \(/nri/community-resilience\)](/nri/community-resilience)

Related Terms

[Expected Annual Loss](#), [Natural Hazard Risk](#), [Natural Hazards](#), [Social Vulnerability](#)

Consequence Types

Consequences of natural hazard occurrences are categorized into three different types: buildings, population, and agriculture.

Related Terms

[Expected Annual Loss](#), [Exposure](#), [Historic Loss Ratio](#), [Natural Hazard Risk](#)

Drought

A Drought is a deficiency of precipitation over an extended period of time resulting in a water shortage.

[Learn more about Drought \(/nri/drought\)](#)

Related Terms

[Heat Wave](#), [Natural Hazards](#), [Wildfire](#)

Earthquake

An Earthquake is a shaking of the earth's surface by energy waves emitted by slowly moving tectonic plates overcoming friction with one another underneath the earth's surface.

[Learn more about Earthquake \(/nri/earthquake\)](#)

Related Terms

[Avalanche, Natural Hazards, Tsunami, Volcanic Activity](#)

Expected Annual Loss

Expected Annual Loss (EAL) is a natural hazards component of the National Risk Index that represents the average loss in dollars to buildings, population, and/or agriculture (consequence types) each year due to natural hazards.

[Learn more about Expected Annual Loss \(/nri/expected-annual-loss\)](#)

Related Terms

[Agriculture Exposure Value, Annualized Frequency, Avalanche, Building Exposure Value, Coastal Flooding, Cold Wave, Community Resilience, Drought, Earthquake, Exposure, Hail, Heat Wave, Historic Loss Ratio, Hurricane, Ice Storm, Landslide, Lightning, Natural Hazard Risk, Natural Hazards, Population Exposure, Riverine Flooding, Social Vulnerability, Strong Wind, Tornado, Tsunami, Value of Statistical Life \(VSL\), Volcanic Activity, Wildfire, Winter Weather](#)

Expected Annual Loss Rate

Expected Annual Loss Rate is a measure of relative natural hazard intensities independent of the community's exposure value. They represent the average percentage losses to buildings, population, and/or agriculture (consequence types) each year due to natural hazards.

[Learn more about Expected Annual Loss Rate \(/nri/expected-annual-loss#expected-annual-loss-rate\)](#)

Related Terms

[Agriculture Exposure Value](#), [Building Exposure Value](#), [Expected Annual Loss](#), [Population Exposure](#)

Exposure

Exposure is a natural hazard consequence factor for Expected Annual Loss, a risk component of the National Risk Index. It is the representative value of buildings, population, or agriculture potentially exposed to a natural hazard occurrence.

Related Terms

[Agriculture Exposure Value](#), [Annualized Frequency](#), [Avalanche](#), [Building Exposure Value](#), [Coastal Flooding](#), [Cold Wave](#), [Drought](#), [Earthquake](#), [Expected Annual Loss](#), [Hail](#), [Heat Wave](#), [Historic Loss Ratio](#), [Hurricane](#), [Ice Storm](#), [Landslide](#), [Lightning](#), [Natural Hazard Risk](#), [Natural Hazards](#), [Population Exposure](#), [Riverine Flooding](#), [Strong Wind](#), [Tornado](#), [Tsunami](#), [Value of Statistical Life \(VSL\)](#), [Volcanic Activity](#), [Wildfire](#), [Winter Weather](#)

Fishnet Grid

A fishnet grid is a geographic information system (GIS) feature containing a net of rectangular cells that can be used for sampling locations or as aggregation areas.

Related Terms

[Geographic Information Systems \(GIS\)](#)

Geographic Information Systems (GIS)

A geographic information system (GIS) is a database system with software that can analyze and display data in a visual environment using digitized maps and tables. Maps and data may be layered, displayed, edited, and analyzed in a wide variety of ways.

Related Terms

[Census Blocks](#), [Census Tracts](#), [Fishnet Grid](#), [Raster](#)

Hail

Hail is a form of precipitation that occurs during thunderstorms when raindrops, in extremely cold areas of the atmosphere, freeze into balls of ice before falling towards the earth's surface.

[Learn more about Hail \(/nri/hail\)](#)

Related Terms

[Hurricane, Natural Hazards](#)

Heat Wave

A Heat Wave is a period of abnormally and uncomfortably hot and unusually humid weather typically lasting two or more days with temperatures outside the historical averages for a given area.

[Learn more about Heat Wave \(/nri/heat-wave\)](#)

Related Terms

[Drought, Natural Hazards, Wildfire](#)

Historic Loss Ratio

Historic loss ratio (HLR) is a natural hazard consequence factor of the Expected Annual Loss component of the National Risk Index. It is a hazard- and county-specific estimate of the percentage of the exposed consequence type (building

value, population, or agriculture value) expected to be lost due to a hazard occurrence.

Related Terms

[Agriculture Exposure Value](#), [Annualized Frequency](#), [Avalanche](#), [Building Exposure Value](#), [Coastal Flooding](#), [Cold Wave](#), [Drought](#), [Earthquake](#), [Expected Annual Loss](#), [Exposure](#), [Hail](#), [Heat Wave](#), [Hurricane](#), [Ice Storm](#), [Landslide](#), [Lightning](#), [Natural Hazard Risk](#), [Natural Hazards](#), [Population Exposure](#), [Riverine Flooding](#), [Strong Wind](#), [Tornado](#), [Tsunami](#), [Value of Statistical Life \(VSL\)](#), [Volcanic Activity](#), [Wildfire](#), [Winter Weather](#)

Hurricane

A Hurricane is a tropical cyclone or localized, low-pressure weather system that has organized thunderstorms but no front (a boundary separating two air masses of different densities) and maximum sustained winds of at least 74 miles per hour (mph).

[Learn more about Hurricane \(/nri/hurricane\)](/nri/hurricane)

Related Terms

[Coastal Flooding](#), [Hail](#), [Lightning](#), [Natural Hazards](#), [Riverine Flooding](#), [Strong Wind](#), [Tornado](#)

An Ice Storm is a freezing rain situation (rain that freezes on surface contact) with significant ice accumulations of 0.25 inches or greater.

[Learn more about Ice Storm \(/nri/ice-storm\)](/nri/ice-storm)

Related Terms

[Cold Wave](#), [Natural Hazards](#), [Winter Weather](#)

Landslide

A Landslide is the movement of a mass of rock, debris, or earth down a slope.

[Learn more about Landslide \(/nri/landslide\)](/nri/landslide)

Related Terms

[Coastal Flooding](#), [Earthquake](#), [Hurricane](#), [Natural Hazards](#), [Riverine Flooding](#), [Tsunami](#), [Volcanic Activity](#), [Winter Weather](#)

Lightning

Lightning is a visible electrical discharge or spark of electricity in the atmosphere between clouds, the air, and/or the ground often produced by a thunderstorm.

[Learn more about Lightning \(/nri/lightning\)](/nri/lightning)

Related Terms

[Hail](#), [Hurricane](#), [Natural Hazards](#), [Winter Weather](#)

Natural Hazard Risk

Natural hazard risk is the potential for negative impacts as a result of a natural hazard.

Related Terms

[Agriculture Exposure Value](#), [Annualized Frequency](#), [Avalanche](#), [Building Exposure Value](#), [Coastal Flooding](#), [Cold Wave](#), [Community Resilience](#), [Drought](#), [Earthquake](#), [Expected Annual Loss](#), [Exposure](#), [Hail](#), [Heat Wave](#), [Historic Loss Ratio](#), [Hurricane](#), [Ice Storm](#), [Landslide](#), [Lightning](#), [Natural Hazards](#), [Population Exposure](#), [Riverine Flooding](#), [Social Vulnerability](#), [Strong Wind](#), [Tornado](#), [Tsunami](#), [Value of Statistical Life \(VSL\)](#), [Volcanic Activity](#), [Wildfire](#), [Winter Weather](#)

Natural Hazards

Natural hazards are environmental phenomena that impact societies and the human environment.

[Learn more about Natural Hazards \(/nri/natural-hazards\)](#)

Related Terms

[Annualized Frequency](#), [Avalanche](#), [Coastal Flooding](#), [Cold Wave](#), [Community Resilience](#), [Drought](#), [Earthquake](#), [Expected Annual Loss](#), [Exposure](#), [Hail](#), [Heat Wave](#), [Historic Loss Ratio](#), [Hurricane](#), [Ice Storm](#), [Landslide](#), [Lightning](#), [Natural Hazard Risk](#), [Natural Hazards](#), [Riverine Flooding](#), [Social Vulnerability](#), [Strong Wind](#), [Tornado](#), [Tsunami](#), [Value of Statistical Life \(VSL\)](#), [Volcanic Activity](#), [Wildfire](#), [Winter Weather](#)

Population Exposure

Population exposure refers to the estimated number of people determined to be exposed to a hazard according to a hazard-specific methodology.

Related Terms

[Expected Annual Loss](#), [Exposure](#), [Historic Loss Ratio](#), [Natural Hazard Risk](#), [Value of Statistical Life \(VSL\)](#)

Raster

A raster consists of a matrix of cells (or pixels) organized into rows and columns (or a grid) where each cell contains a value representing information. The cell values represent the phenomenon portrayed by the raster dataset, such as

category or magnitude.

Related Terms

[Geographic Information Systems \(GIS\)](#)

Risk Value

Risk value represents the average loss in dollars to buildings, population, and/or agriculture (consequence types) each year to a community due to natural hazards adjusted based on the community's Social Vulnerability and Community Resilience.

[Learn more about Risk Value \(/nri/determining-risk\)](/nri/determining-risk)

Related Terms

[Community Resilience](#), [Expected Annual Loss](#), [Social Vulnerability](#)

Riverine Flooding

Riverine Flooding is when streams and rivers exceed the capacity of their natural or constructed channels to accommodate water flow and water overflows the banks, spilling out into adjacent low-lying, dry land.

[Learn more about Riverine Flooding \(/nri/riverine-flooding\)](/nri/riverine-flooding)

Related Terms

[Coastal Flooding](#), [Hurricane](#), [Landslide](#), [Natural Hazards](#), [Tsunami](#), [Winter Weather](#)

Social Vulnerability

Social vulnerability is a consequence enhancing risk component and community risk factor that represents the susceptibility of social groups to the adverse impacts of natural hazards, including disproportionate death, injury, loss, or disruption of livelihood.

[Learn more about Social Vulnerability \(/nri/social-vulnerability\)](#)

Related Terms

[Community Resilience](#), [Expected Annual Loss](#), [Natural Hazard Risk](#), [Natural Hazards](#)

Strong Wind

Strong Wind consists of damaging winds, often originating from thunderstorms, that are classified as exceeding 58 miles per hour (mph).

[Learn more about Strong Wind \(/nri/strong-wind\)](#)

Related Terms

[Coastal Flooding](#), [Hurricane](#), [Natural Hazards](#), [Tornado](#), [Winter Weather](#)

Tornado

A Tornado is a narrow, violently rotating column of air that extends from the base of a thunderstorm to the ground and is visible only if it forms a condensation funnel made up of water droplets, dust and debris.

[Learn more about Tornado \(/nri/tornado\)](#)

Related Terms

[Hurricane](#), [Natural Hazards](#), [Strong Wind](#)

Tsunami

A Tsunami is a wave, or series of waves, generated by an Earthquake, Landslide, volcanic eruption, or even a large meteor hitting the ocean and causing a rise or mounding of water at the ocean surface. A Tsunami can travel across open ocean at about 500 miles per hour (mph), and slow down to about 30 mph as it approaches land, causing it to grow significantly in height.

[Learn more about Tsunami \(/nri/tsunami\)](#)

Related Terms

[Coastal Flooding](#), [Earthquake](#), [Landslide](#), [Natural Hazards](#), [Population Exposure](#), [Riverine Flooding](#), [Volcanic Activity](#)

Value of Statistical Life (VSL)

Monetary value of preventing one statistical death. Within the National Risk Index, a VSL of \$11.6M per fatality or 10 injuries is used to monetize population losses so that a total expected annual loss value can be computed that considers losses to buildings, population, and agriculture.

Related Terms

[Expected Annual Loss](#), [Exposure](#), [Historic Loss Ratio](#), [Natural Hazard Risk](#), [Population Exposure](#)

Volcanic Activity

Volcanic Activity occurs via vents that act as a conduit between the Earth's surface and inner layers, and erupt gas, molten rock and volcanic ash when gas pressure and buoyancy drive molten rock upward and through zones of weakness in the Earth's crust.

[Learn more about Volcanic Activity \(/nri/volcanic-activity\)](/nri/volcanic-activity)

Related Terms

[Earthquake](#), [Natural Hazards](#), [Tsunami](#), [Wildfire](#)

Wildfire

A Wildfire is an unplanned fire burning in natural or wildland areas such as forests, shrub lands, grasslands, or prairies.

[Learn more about Wildfire \(/nri/wildfire\)](#)

Related Terms

[Drought](#), [Heat Wave](#), [Lightning](#), [Natural Hazards](#), [Volcanic Activity](#)

Winter Weather

Winter Weather consists of winter storm events in which the main types of precipitation are snow, sleet or freezing rain.

[Learn more about Winter Weather \(/nri/winter-weather\)](#)

Related Terms

[Avalanche](#), [Coastal Flooding](#), [Cold Wave](#), [Ice Storm](#), [Natural Hazards](#), [Riverine Flooding](#), [Strong Wind](#)
